SEED CORN

of the

BEST QUALITY KANSAS GROWN.

At no time in the history of American agriculture has it been so necessary to secure maximum returns from farming as at the present, and there is no crop the farmer raises that will give increased returns in proportion to care in seed selection as CORN.

One grain of corn will produce MORE CORN than a similar quantity of any other cereal will produce of its kind. PLANT GOOD SEED. We have it, at reasonable prices, selected and graded seed, tips and butts off.

We grow and contract for our corn with the best corn growers in this state and they have received First Prize Money at the Kansas State Fair and other Corn Exhibits. Our prices are reasonable and we hope to get your order early. Let us book it NOW and we will ship when you are ready for it.

SPECIAL—If you expect to buy seed corn this year, let us know. We will send you **FREE** of charge, **SAMPLES** of any kinds you want, and the corn will be just as the samples are we send you, or you ship it back to us and we will refund your **MONEY**. We offer you as follows:

DIAMOND JOE'S BIG WHITE (EARLY).

was brought into our home county (Shawnee), three years ago from Iowa, and it has become thoroughly acclimated with our climatic conditions and our crop this year will average 80 bushels per acre, and everywhere tried and tested, north, south, east and west, it has proven a wonderful success, producing enormous yields and maturing as early as the earliest varieties of big white corn.

DESCRIPTION:—Stalks are large, strong and robust, growing to a height of 8 to 12 feet, dependent upon the land; a great drought resister; broad blades and many of them; ears 8 to 12 inches long and 7 to 8 inches in circumference; 16 to 20 rows, deep grains, solidly set on a medium size cob; cobs white, matures in about 100 days, every stalk producing one to three good ears. It is not only adapted to good, strong ground, but will do better and return larger yields on old, poor, thin or hilly ground than any other variety in existence. In short, it is the embodiment of all the good qualities contained in all the best varieties. It's the sure thing—all we claim for it. Our seed stock of this corn is exceptionally fine this year (extra choice), having been grown from absolutely pure seed stock, and we have made a selection of the most choice ears, and hope to be able to fill every order promptly that comes to us this year. Price per single bushel, \$2.50.

**IMPROVED INDIAN SQUAW CORN.**

Holds more records for wonderful performances under difficult conditions than any corn ever grown. It has an extremely early variety, maturing in 85 days. The kernels are of different colors, Blue pins and red and white, giving the ears a curious beautiful mottled appearance. Order early. We always sell out. ARTICHOKES

The New Large Jerusalem Variety, producing from 300 to 600 bushels per acre. An excellent food for hogs, cattle, sheep and milch cows; they are for the production of milk equal if not superior to bran. But their greatest value is food for hogs. Even the labor of feeding is avoided, as the hogs will help themselves if allowed to do so. We consider them the cheapest and healthiest hog food possible to raise, and find that where brood sows have free access to Artichokes they and their pigs invariably do well. Hogs will not only grow, but fatten on them.

Price, $\frac{1}{4}$ bushel, 60c. Price, per bushel, 50 pounds, \$2.00.

Musk Melons---Cantaloupes

Grow "Honey Dew" Melons

THE SWEETEST MELON EVER GROWN.

First introduced in the West in 1915, and is fast becoming a favorite.

The rind is a dull white when ripe. Part of the melons show slight checks in the rind like a tendency to net. This appears when the melon is ready to pick.

The size runs six to seven inches in diameter from top to bottom and eight inches in length. The matured melons are practically all the same shape and size.

The flesh is a rich green and very sweet. The melon is the best of all shippers and will keep several weeks so there is practically no loss from spoiled melons in shipping.

I recommend this melon to market growers. The vines are vigorous and set six to ten melons to the hill and if proper care is taken to ship only ripe melons a fine market can be established.

My supply of seed is strictly right and grown from carefully selected stock seeds.

Price, per pkt., 5c; oz., 20c; lb., \$2.50.

GENUINE ROCKY FORD.

This new musk melon is similar to the oval strain of Netted Gem. The strain here offered originated with the melon growers in the vicinity of Rocky Ford, Colorado, who have shipped this melon from that distant Western point to Eastern markets. The melons grown by them are so fine in quality as to outsell all others, and the demand for such melons has been far beyond the supply. Pkt., 5c; oz., 10c; ¼ lb., 20c; lb., 60c.

BURRELL'S GEM.

It has a thin, tough rind and is closely netted. The meat is of a reddish orange, very thick, fine grained and spicy. The seed cavity is unusually small. All these points combined make it a first class melon, both for its good eating and fine shipping qualities. ½ oz., 5c; oz., 10c; ¼ lb., 20c; lb., 60c.

Pkt., c; oz., 10c; ¼ lb., 20c; lb., 75c.

TIP TOP.

A new melon of recent introduction and very deserving. All who have tried it have pronounced it one of the finest. Flesh yellow and sweet. Pkt., 5c; oz., 10c; ¼ lb., 20c; lb., 75c.

Pear Tomatoes for Preserving

Our Tomato Seed is grown for us by the most reliable growers in the world; true to name and sure to grow. Let us prove it to you this year.

Bonny Best Tomato

For a really good extra early tomato, this new prolific variety is a wonder and the market gardeners or shippers who plant it are bound to get top prices of the earliest market. It's a wonder for extra earliness, smoothness and heavy bearing; immensely prolific, combined with vigorous growing qualities. Begins to "set" fruit from the first blooms, and as the foliage is rather light and open it lets the sun in to color and ripen the fruit quickly. Our illustration from a photograph shows about one-third its size and its extremely heavy bearing qualities. Begins with the earliest and keeps right along bearing. Fruits are from 2½ to 3 inches in diameter. Its color is an intense glowing scarlet, and ripens evenly. A splendid shipper and of very fine eating quality for home garden use. Its smoothness of skin and regularity are exceptional for an extra early variety. If you are a truck grower you cannot afford to miss planting it; if you are a home gardener you need it for earliest use. We have seen as many as 34 good sized, smooth, ripe tomatoes on a single plant at one time. Immensely prolific and beyond question the most desirable extra early tomato offered for sale. It represents years of closest and most careful work in seed selection and plant breeding. Pkt., 10c; ½ oz., 20c; oz., 35c; ¼ lb., \$1.00; lb., \$3.50, postpaid.

John Baer Tomato

One of the earliest and best Tomatoes now produced. This Tomato is well adapted to main crop planting. It matures so quickly that it ranks first in the market gardener's field for early market purposes. The form is perfect, uniform, large and attractive. The flesh is very firm. A robust grower, with short joints setting its clusters closer together than most varieties of early tomatoes. Our illustration shows one branch of clusters, which hang profusely over the vines. They are a brilliant deep red color, no core, almost free from seed and very fine flavored. Fruit ripens evenly, and is a good shipper. Our seed is produced by one of the largest seed growers in the world, and is true to name and type. Price, pkt., 5c; oz., 35c; ¼ lb., \$1.25; lb., \$5.00.

HAYES NEW ROASTING EAR CORN

In introducing this NEW VARIETY OF ROASTING EAR CORN. We do not hesitate to say it is one of the very earliest now grown, and you can get corn for your table in about 60 days from planting. While this corn is not a true sweet corn you can hardly tell the difference. It is far ahead of the Early Adams Varieties. The ears are from 8 to 10 inches long and have two to three ears to the stalk. The picture here shown, is a true Photograph of an ideal ear of this GRAND NEW CORN. We have only a limited amount of this seed corn for sale this season, so send us your order at once. Price per 4 oz., 10c; 1 lb., 20c.; 2 lbs., 35c. Postpaid.
